

YourFunction.m

```
% some code  
% some code  
% some code
```

```
path_name = mfoldername(mfilename('fullpath'),'Save');  
or  
path_name = mfoldername('YourFunction','Save');
```

```
% code for saving your data, figures, etc.  
% For example: save(path_name)
```

Always have the correct **save** and **load** path! Works with Windows and Unix

Some location
on your
computer

... + FunLocation/ + Save/ = **path_name**
